REGO-FIX

Achieve perfect torque with any wrench

TORCO-BLOCK The only tool assembly device in the market that is easy and safe to use with integrated torque measuring. Usability ranges from ER 11 to ER 32, from 1 to 22 mm and boasts all standard machine interfaces from HSK to steep taper.

TORCO-BLOCK provides

- // Use any suitable wrench and still be able to correctly measure torque and reduce possibility of cracked or damaged holders
- // Minimum force needed
- // Easy-to-read torque limits reducing the possibility of over tightening
- // Quick-change function for different taper adapters within seconds with only one 4 mm Allen-key
- // Accident-free assembling of cutting tools
- // Easy-to-change adapters and torque rings quick-lock interface inserts
- // Required footprint 170 x 270 mm
- // Correct installation of pull studs with normal wrenches
- // Full or overhang mounting possible
- // TORCO-BLOCK supplied inclusive indicator rings IR

Unit needs a stable workbench to be attached to with M10 screws.
